WHAT DOES THE MONTHLY MINIMUM FACILITIES CHARGE COVER?

This account includes a monthly minimum charge of \$29.00. This charge is designed to cover, in part, the fixed cost of making electric service available to members. It is not designed to cover fuel and/or purchase power costs (KWH), which is recovered in the energy charge. The monthly minimum charge is determined by your coop's investment in system facilities, operation and maintenance cost. Thus, even if a member uses no electricity, WIN Energy still incurs costs related to maintaining facilities (lines, service drops, transformers, meters, etc.) necessary to supply service.

Compare this month to last month's usage and to the same month a year ago.
